SUMMARY

DevOps Engineer/Site Reliability Engineer with 4+ years of experience building and maintaining CI/CD pipelines, microservices architectures, and high-availability systems. Expert in infrastructure as code with Terraform, containerization with Docker/Kubernetes, and monitoring tools (ELK, Prometheus, Grafana). Proven track record implementing secure networking solutions and optimizing cloud infrastructure (AWS, GCP) resulting in 40% cost reductions and 30% performance improvements.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS, GCP, Digital Ocean
- **CI/CD:** Drone, GitHub Actions, Jenkins, Argo CD
- **Containers:** Docker, Kubernetes, Helm 3
- **Monitoring:** ELK Stack, Prometheus, Grafana, Loki, AWS CloudWatch, Zabbix
- **Infrastructure as Code:** Terraform, CloudFormation, Ansible
- **Security:** SSL/TLS, HashiCorp Vault, IAM, Certificates, Secrets Management
- **Networking:** DNS, VPN, Firewalls, Load Balancing, Subnetting, Security Groups
- **Protocols:** HTTP/S, TCP & UDP, SSH, SMTP
- **Automation:** Ansible, Terraform
- **Operating Systems:** Linux (Debian, RHEL)
- **Backend Development:** Python, Java, Microservices Architecture
- **Code Management:** Git, Maven, Gradle, npm
- **Soft Skills:** Problem-solving, Team collaboration, Communication, Decision-making

EXPERIENCE

DevOps Engineer — Venturenox

Aug 2022 – Present

- Designed and maintained CI/CD pipelines using GitHub Actions and Argo CD, enabling automated testing, building, and deployment across AWS.
- Implemented Infrastructure as Code (IaC) solutions using Terraform for consistent, version-controlled infrastructure deployment.
- Deployed and managed containerized microservices on Kubernetes (EKS, GKE) with Docker, improving system performance by 30%.
- Set up comprehensive monitoring solutions with ELK Stack, Prometheus, and Grafana for real-time health checks and incident response.
- Configured and managed secure networking components including DNS, VPN, firewalls, load balancers, and security groups.
- Implemented best practices for certificates, SSL/TLS, and secrets management using HashiCorp Vault.
- Applied SRE principles with root-cause analysis, leading to a 40% cost reduction via automation and resource optimization.
- Designed and enforced Kubernetes security controls including RBAC, Network Policies, and Pod Security Standards.
- Automated backup, disaster recovery, and failover mechanisms for production systems using Velero.
- Managed Blue/Green and Canary deployments using ArgoRollouts.
- Optimized Kubernetes clusters using HPA, VPA, and Cluster Autoscaler to improve scalability and cost efficiency.
- Authored detailed technical documentation for infrastructure architecture and operational workflows.

- Deployed and tested Emissary Ingress as an API Gateway for microservice workloads.
- Implemented Kubernetes cluster backups with Velero.

SELECTED PROJECTS

Testfuse

testfuse.com

AI-driven personality insight platform for talent acquisition

- Implemented automated CI/CD pipeline on Google Cloud Platform using GitLab CI and Argo CD.
- Set up IT environments in the cloud using Infrastructure as Code practices.
- Deployed and managed microservices on Google Kubernetes Engine (GKE) for scalability.
- Configured monitoring and health checks for all system components.
- Technology stack: GCP, GitLab CI, Argo CD, GKE, Kubernetes, Terraform.

Levy

levvy.com

Work management platform supporting outsourced teams

- Designed secure, stable, high-availability AWS infrastructure, reducing expenses by 40%.
- Implemented Amazon EKS for microservices orchestration and workload management.
- Set up Apache Airflow for workflow automation and scheduled jobs.
- Applied a "you build it, you run it" philosophy with independent fault clearance and troubleshooting.
- Deployed and tested Emissary Ingress as an API Gateway for microservice workloads.
- Implemented Kubernetes cluster backups with Velero.
- Technology stack: AWS, EKS, Terraform, Vault, Docker.

Crewnetics

crewnetics.com

Productivity insights tool with non-intrusive tracking

- Designed and built ECS infrastructure for backend workloads.
- Deployed Metabase for building custom analytics dashboards powered by PostgreSQL.
- Set up CI/CD pipelines for dev, staging, and production environments.
- Deployed Grafana Stack for observability and alerting.
- Technology stack: AWS ECS, Metabase, PostgreSQL, Grafana Stack, Terraform, Docker.

EDUCATION

Bachelor's (Hons) in Computer Science

Lahore Leads University, Lahore

Graduated 2022
